(54) OPTICAL RECORDING MEDIUM AND METHOD OF RECORDING AND REPRODUCING INFORMATION

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an optical recording medium which is optimum for recording and erasure in the area of a high linear velocity and excellent in the reliability in respect to high-speed recording and erasure and which enables execution of multi-speed CLV recording and CAV recording, in regard to a phase change type recording medium.

SOLUTION: In the optical recording medium having at least a phase change type recording layer on a disk-shaped base, the constituent elements of the recording layer are Ge, In, Sb and Te in the main, and the respective composition ratios „ „ „ „ and „ (atom.%) of the elements are $0.1 \leq \text{ „ } \leq 7$, $1 \leq \text{ „ } \leq 9$, $61 \leq \text{ „ } \leq 75$ and $22 \leq \text{ „ } \leq 30$, in the main constitution, when „+„+„+„=100. Five items other than the above are mentioned for the constitution.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
